penergetic

penergetic b WV

With the impulse of nature.

Biostimulation with Penergetic products for protection from browsing by game.

The game bite problem is solved organically and sustainably with penergetic b WV. No time-consuming fencing or periodic application is necessary. Penergetic b WV protects arable land and the environment in a sustainable and effective way.

- *Protection from game browsing*
- *Does not require electricity*
- *Suitable for wild boars*
- *Long-term effect even after precipitation*
- *Odourless*

* Approved for use in organic agriculture in Switzerland according to the FIBL inputs list.

Application

Penergetic b WV is applied as a soil application. It is sprayed after seeding. Penergetic b WV can be mixed with spray agents or liquid manure.

The game deterrent product can be combined with penergetic b (soil quality) and penergetic p (plant strengthening)*.
