

penergetic coat

Use 3 ml of *penergetic coat* per 1 kg of seeds
Add maximum 3 parts of water to 1 part of *penergetic coat*

Stir the premix well

Add the seeds to the liquid premix

Mix the seeds and the *penergetic coat* premix well, until all seeds are firmly coated

Dry the seeds
Seeds can also be dried outside on the floor or similar

Penergetic coat can be combined with commonly used seed coating products. In order to have a better visual evidence of the coated seeds, a colour can be added in the first step.

Application for all kind of seeds.
